- Exclusive site visits at Callao Port and infrastructure projects
- Meeting with multilateral agencies
- Networking events
- Participate at the **Future Energy Summit Peru 2026**

Main Opportunities for Swiss Companies – Peru

PNI 2026–2031 Portfolio overview (72 projects)

CHF 32.7 bn

Transport: Largest share of PNI portfolio

Agriculture & irrigation: Major focus area

Water & sanitation: High number of projects

Electricity: Grid / transmission investments

Social sectors: Health & education

Peru approved the National Infrastructure Plan 2026–2031 (PNI) in March 2026, prioritizing 72 projects. The plan introduces a territorial approach (four macro-zones) and strengthens governance (action plans, accountable owners, and MEF monitoring). Public-Private-Partnership (PPP) are the main investment tool.

WATER & SANITATION (PPP)

Trujillo / Chepen Water Treatment Station: CHF 603 m – expected award Q4 2026

Desalination and surface-water strengthening project for potable water in Ilo: CHF 217 m – expected award Q4 2026

ELECTRICITY

Group 2 Transmission Plan 2025–2034 package: CHF 123 m – expected award Q4 2026

Power generation using a photovoltaic solar system: CHF 68 m – currently in planning

HEALTH (O&M PPP)

Hospital de Apoyo II-2 Sullana replacement of clinical/non-clinical equipment and grey/green services.: CHF 146 m – expected award Q4 2026

GIRSE (medical waste) for 387 facilities: CHF 160 m – expected award Q4 2026

PORTS / AIRPORTS / TOURISM

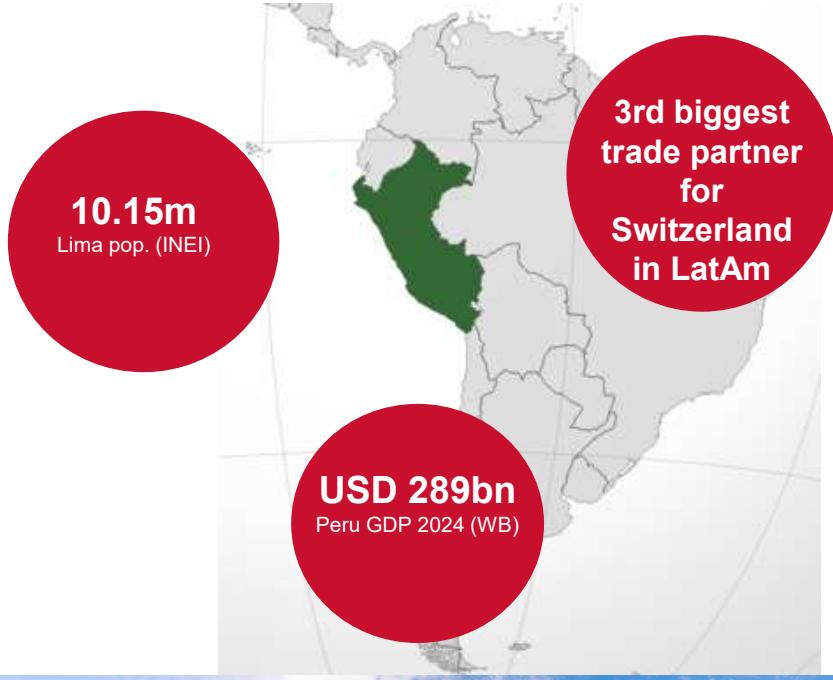
Teleferico Ciudad de Yungay, Cable-car access : CHF 67 m – expected award Q4 2026

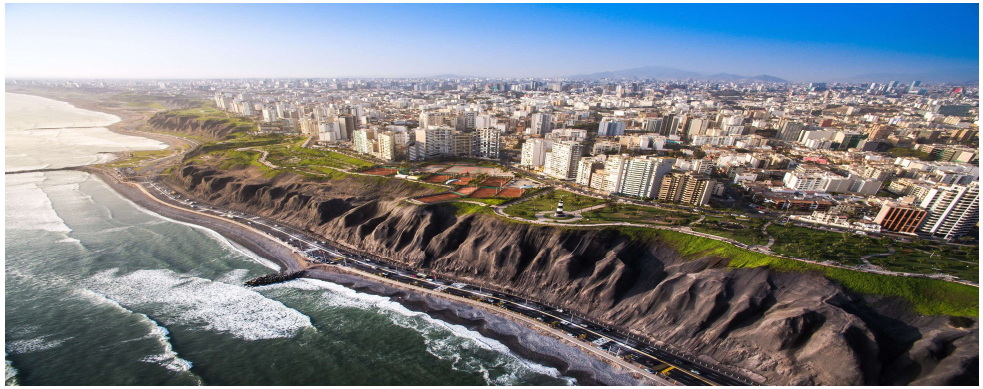
Terminal Internacional de Chimbote: CHF 402 m – expected award Q1 2027

Peru: Lima & Country Snapshot

Lima: the main hub to serve the Peruvian market.

Lima concentrates a large share of Peru's population, institutions and business services. Public investment is guided by Peru's National Infrastructure Plan 2026–2031 (PNI), prioritizing 72 projects and strengthening governance and monitoring.
For Swiss companies, opportunities typically arise in water & sanitation, electricity transmission, transport/logistics, and health O&M services—often through PPP-style schemes and structured concessions.





Sources: INEI (Metropolitan Lima population note, 17 Jan 2023); World Bank (GDP current US$, 2024); Fitch Ratings (Peru affirmed at BBB, outlook stable, 30 Oct 2025).

Future Energy Summit in Peru

International Exhibition for Infrastructure business opportunities

•**Market gateway:** FES Peru is a key meeting point in Lima for renewable energy and the energy transition. Ideal to validate Peru opportunities fast.

•**Meet decision-makers:** It brings together senior leaders from the renewables ecosystem.

•**Project intelligence:** The agenda focuses on transition opportunities and synergies.

•**Showcase Swiss solutions:** FES promotes new technologies for sustainable development. Good fit to position Swiss tech for renewables and enabling infrastructure.

•**Convert networking into deals:** The event emphasizes exclusive networking spaces for business opportunities.

28 September 2026,
Lima, Peru

+50 high-level speakers
+29 partners
+500 executives from the sector

Program Swiss Delegation (draft)

Tuesday, September 29: Gain strategic insights through an exclusive briefing at the Swiss Residence and meetings with the World Bank Group, International Finance Corporation, and Peru's Private Investment Promotion Agency.

Wednesday, September 30: Connect with high-level Peruvian authorities through meetings with the Presidency of the Council of Ministers of Peru and the Ministry of Economy and Finance. Gain key insights into policy, macroeconomics, and PPP opportunities through meetings with leading private-sector associations, including the Lima Chamber of Commerce and the Association for the Promotion of National Infrastructure.

Thursday, October 1 : Experience strategic infrastructure projects first-hand through exclusive site visits at Callao Port, engaging directly with operators and regulatory authorities.
