Capanda - Irrigation Project

## Main information

### THE NEED

- Capanda region located north of the Cuanza River, near the city of Malanje.
- One of the largest irrigation areas -50,000 Ac
- The government is responsible for irrigation infrastructure from the river up to private farms
- Installation of water meter for collection by use

### THE PROJECT

- A turn key project – irrigation and water supply
- Establishment of two pumping stations on the bank of Cuanza river
- Main water delivery pipes that transfer the water from the pumping stations to reservoirs in the upper elevation of the area
- Water distribution to framers
- Control centre – monitoring piping from reservoirs for all year supply

# Pumping Station

2 main pipelines

## Area water reservoir
