

Comprehensive Packages

Company name	ERi Banking Software Pte. Ltd.
Company URL/Webpage Company Logo	http://www.olympicbankingsystem.com/index.jsp 

Profile:

ERi is an international company, specialising in the design, development, implementation and support of an integrated, real-time banking and asset/wealth management software solution: OLYMPIC Banking System.

ERi is the market leader in the provision of banking and asset/wealth management software in many countries, especially in Luxembourg, Monaco and Switzerland.

Providing extensive coverage of front, middle and back-office functions, OLYMPIC Banking System is modular, thus allowing banks to initially set up the core system, and then add optional modules as their needs evolve.

Thanks to its highly flexible, modern, parameter-based design, OLYMPIC Banking System is also able to meet most customisation requirements through parameter changes. This reduces the requirement for development of software modifications, so reducing the risks, complexity and cost of implementation.

OLYMPIC Banking System has been chosen by over 300 banks and financial institutions in over 50 countries around the world.

Presenting:

- The OLYMPIC Banking System

The System is a browser-based, fully-integrated, online, front-to-back, parameter-driven, private banking and wealth management (PWM) solution . Its flexible conceptual design is based around a core system which groups all centralised functions and offers a wide choice of fully integrated optional modules.

Within each business line, the OLYMPIC Banking System covers the complete front-to-back cycle through native workflows and/or bank-defined conditional business processes.

The use of the latter enables banks to customise their level of automation and interaction with 3rd-party systems. It is also a customer-centric solution, designed to optimise customer servicing and operations within a user-friendly environment.

Synergized Packages:

Company name	AlgoTrader AG, Cysec SA and Metaco SA
Company URL/Webpage	AlgoTrader: www.algotrader.com Cysec: www.cysec.systems Metaco: www.metaco.com
Company Logo	

Profile:

AlgoTrader:

AlgoTrader is an institutional-grade algorithmic trading software solution for conducting quantitative research, trading strategy development, strategy back-testing, trade execution and automated trading for both traditional securities and crypto assets. Based in Zurich, New York, and Singapore, AlgoTrader operates globally.

Cysec:

Cysec Systems is a cyber-security company that aims to provide a secure environment for multi-application execution in the form of an enterprise-grade server appliance. The solutions provided targets blockchain applications that require a secure wallet system for the management of crypto assets.

Metaco:

Metaco is a Swiss financial technology company securing the foundations of the tokenised economy. Established in 2015 Metaco made its breakthrough with the launch of SILO, the digital asset management solution for banks trusted by global market infrastructure providers and banks including Avaloq, Swisscom, Deutsche Börse, Gazprombank and Sygnum.

Presenting:

- Aside from presenting the individual solutions from each company (AlgoTrader: Esper CEP system, Cysec: ARCA 1, and Metaco: SILO), the companies will also be showcasing how these solutions work together and complement each other through an applicable use case.

A run through of their Business Case is as follows:

INTRODUCTION

Throughout the past ten years, digital assets have increasingly gained relevance in the financial sector. Beyond the growth of cryptocurrency markets including Bitcoin and Ethereum, asset tokenization has become the key application of distributed ledgers: by 2027, it is expected that 10% of the capital markets will be tokenized, effectively shifting the global economy to a token-based paradigm.

THE CHALLENGE

Digital assets rely on private keys to prove ownership and authorize transfers. Keeping the keys - and equally important, the control and governance of those keys - safe and secure from both internal and external threats is essential to the integrity of the assets. Custodians aiming to build a digital asset service stack need a robust foundation to manage and trade with their digital assets within a fragmented trading landscape: a solution that is secure, full-featured and which blends seamlessly into their infrastructure, systems and processes.

THE SOLUTION

METACO, AlgoTrader and Cysec offer a comprehensive, all Swiss-made digital asset management ecosystem for financial institutions to manage the entire lifecycle of their digital assets: from secure storage and management to automated trading and execution.

The ecosystem builds on the leadership and complementary core competencies of the three Swiss companies by combining SILO -METACO's leading digital asset storage and management technology powered by ARCAOne, Cysec's best-in-class hardware security- and AlgoTrader's, institutional-grade automated trading execution for traditional and digital assets by AlgoTrader.

Whether integrated in the bank's systems through APIs or via their core banking infrastructure (e.g Avaloq or Swisscom), the system allows the custodian to:

Manage keys

- Generate and store keys in tamper-proof, FIPS 140-2 certified HSM
- Compute wallet keys and addresses using hierarchical deterministic derivation
- Safekeep all assets against disaster with secure, split, offline backup of key material

Manage wallets

- Deploy an ecosystem of millions of custom configured hot, warm and cold wallets
- Manage hundreds of cryptocurrencies, tokens and permissioned ledgers
- Monitor the status of balances and transactions of all wallets in real-time

Manage transactions

- Create and manage transactions with hardware-enforced, advanced governance workflows
- Monitor transactions and balances real-time
- Maximize on-chain privacy with rigorous address change policies
- Apply compliance policies to incoming transactions

Trade Execution

- Access a wide panel of exchanges and brokers through a unique API
- Rely on smart-order-routing and off-the-shelf execution algos for best execution
- Automate trading for digital and traditional assets
- RFQ & OTC

Company name	CoreLedger, Ambitorio AG and Finetoken AG
Company URL/Webpage	CoreLedger: www.CoreLedger.net Ambitorio: www.ambitorio.com Finetoken: www.finertoken.li
Company Logo	

Profile:

CoreLedger:

CoreLedger provides a decentralised, modular, and extensible operating system for token economies, and is designed for all types of assets and services. The company's core product is Token Economy Operating System (TEOS), which enables businesses to document, tokenise, and trade any goods or services via an API or a user-friendly online platform.

TEOS features a patent-pending multi-party settlement mechanism which increases the liquidity of digital assets, allowing businesses to avoid unnecessary intermediaries and thereby reduce costs and increase efficiency.

Ambitorio:

Ambitorio develops concepts and applications meant for high-security data transfers in the context of blockchain technology. Focusing on high value data, the enterprise provides a platform that allows saving, transferring and licensing data sets in a manner that is immune to interference.

Building on this key technology, Ambitorio promotes the evolution of blockchain products through the development of customer-specific approaches. Home-produced edge devices are drafted individually and are currently being examined in medicine as well as the building industry (planning, architecture).

Finetoken:

Finetoken provides the first worldwide digitally safe and physically secure 999.9 gold token of small denomination at a cost close to material price.

Finetoken enables businesses and their clients to hold 999.9 gold in their wallets and at the same time, redeem the physical gold upon request.

Presenting:

Coreledger, Ambitorio and FineToken will be participating at this year's edition of the SWISS Pavilion at the Singapore Fintech Festival as complementary partners.

- Individual platforms, solutions and products will be presented at the booths (Coreledger: Token Economy Operating System, Ambitorio: Decentralised licensing solution, and Finetoken: Finegoldtoken) as well as how the systems work together in a business used case.

Company name	Swisscom, Swisscom Blockchain, Custodigit and Sygnum
Company URL/Webpage	Swisscom: www.swisscom.com Swisscom Blockchain: www.blockchain.swisscom.com
	Custodigit: www.custodigit.com
	Sygnum: www.sygnum.com

Company Logo

Profile:

Swisscom:

Swisscom is Switzerland's leading telecom company and one of its leading IT company. Swisscom is active in the markets EU, US, APAC. Moreover, Swisscom is one of the leading corporate in the Blockchain, Digital Assets and FinTech space as well as Trust Services.

Swisscom is 51% Confederation-owned and is one of Switzerland's most sustainable and innovative companies .

Swisscom Blockchain:

Swisscom Blockchain is a Blockchain one-stop shop company which offers Enterprise Customers and Startups everything they need for successful implementation of blockchain solutions. The services offered are applicable at every stage of the customers' journey, from the strategic road map through to solutions development and hosting.

Swisscom Blockchain aims to deliver a comprehensive technical solution and trusted ecosystem to manage the entire lifecycle of digital assets and blockchain solutions, while ensuring compliance .

Custodigit:

Custodigit is a pioneering platform service company that enables financial service institutions to provide their customers full access to the Crypto Asset Classes covering crypto assets.

The platform has a rich set of features including integration to core banking systems, secure storage, and key management. The having an institutional grade custody solution ensures that the clients of Custodigit are able to demonstrate regulatory compliance and the peace of mind in the handling of crypto assets.

Custodigit has an ambitious road map to grow the platform to offer a wider range of crypto assets and help their clients scale their business.

Sygnum:

Sygnum is a digital asset technology group based in Singapore and Switzerland, and the world's first digital asset bank. With its Swiss banking and securities dealer licence, as well as its capital markets services licence in Singapore, Sygnum empowers institutional and private qualified investors, corporates, banks and other financial institutions to invest in the digital asset economy with complete trust. The company is the first to offer an independently-controlled, scalable and future-proof regulated digital asset banking solution.

Sygnum's interdisciplinary team of banking, investment and Distributed Ledger Technology (DLT) experts is shaping the development of a trusted digital asset ecosystem. The company is founded on Swiss and Singapore banking heritage and operates globally.

Presenting:

Swisscom joins this year's edition of the Singapore Fintech Festival with three companies that Swisscom works closely with: Swisscom Blockchain, Custodigit and Sygnum

Each of the companies will showcase their own solutions in the areas of blockchain, crypto assets and digital services, and will also be showcasing how their solutions complement each other.
