

INVESTMENT PROMOTION

14

| | | |
|------|---|-----|
| 14.1 | Responsibilities and Services..... | 139 |
| 14.2 | Promotional Policy and Instruments..... | 140 |

Investment promotion is an important part of Swiss economic policy and takes the form of close cooperation between businesses, the state, the cantons, and Switzerland Global Enterprise. The activities used to promote foreign direct investment in Switzerland are organized and coordinated by Switzerland Global Enterprise on behalf of the state.

14.1 RESPONSIBILITIES AND SERVICES

National location promotion is a task shared by the Confederation and the cantons. Acting on behalf of the Confederation (State Secretariat for Economic Affairs SECO) and the cantons, Switzerland Global Enterprise (S-GE) informs foreign potential investors about the particular strengths as well as the underlying conditions of Switzerland as a business location.

The offices S-GE maintains abroad are known as “Swiss Business Hubs” (SBH). The specialists at these hubs are the first point of contact for foreign investors. Foreign investors from countries without an SBH can contact the S-GE team of experts in Switzerland directly. S-GE provides information about the specific benefits of Switzerland as a location and answers location questions on a national level. If a company is interested in the numerous benefits of the different locations in Switzerland, S-GE puts the foreign company in touch with the regional and cantonal business promotion agencies. These, in turn, provide information about the specific benefits of an establishment in their economic area, prepare establishment offers, and support the foreign company in the ongoing establishment process. Even after an investment project has been completed successfully, the business promotion agencies provide investors with ongoing customer care.

Contact addresses can be found in the annex.

14.2 PROMOTIONAL POLICY AND INSTRUMENTS

In line with Switzerland's liberal economic system, economic policy in Switzerland focuses on optimum structuring and support for the general business environment. Financial assistance programs are time-limited and strategic. In general, financial assistance from the state always complements private initiatives.

The possible funding options, the mix of various instruments and the scale of payments depend on the specific investment project. There is always room for individual solutions. It is therefore advisable, once a project has been roughly evaluated, to discuss it with the cantonal economic development agencies first.

14.2.1 Cantonal Promotion

Most Swiss cantons have their own economic development agencies, although some of these work together with other cantons. All cantons can offer tax relief to businesses as an economic development incentive. Other forms of economic assistance vary from canton to canton, depending on interest and regional economic conditions.

14.2.2 Tax Relief as Part of Regional Policy

As part of federal regional policy, specific support is given for the economic development of structurally weak regions such as mountainous areas and rural districts. The federal government can support major investment and innovation projects as well as the establishment of new companies in these regions through tax relief. The main requirement for federal tax relief is that the canton in question also supports the project by providing an equivalent level of tax relief. Since July 1, 2016, 93 regional centers in 19 cantons belong to the regions applying such relief.

The application process for tax relief in connection with regional policies is always handled by the cantons. The cantonal economic development agencies in question provide consultation on the best way to proceed.

14.2.3 Switzerland Innovation

Switzerland Innovation offers domestic and foreign business in Switzerland's first-class locations for developing innovative ideas into marketable products. As a collective instrument of the Federal Government, cantons, science, and industry, Switzerland Innovation strengthens Switzerland's innovative capacity in international competition and creates a platform for making connections between Swiss universities and innovative enterprises.

Large sites suitable for development in the vicinity of leading universities are made available to internationally operating businesses for setting up research and development facilities. Switzerland Innovation consists of five regional locations and one national foundation.

For more information on Switzerland Innovation, please see chapter 12.6.

14.2.4 Innosuisse – Swiss Agency for Innovation Promotion

Innosuisse is Switzerland's federal innovation promotion agency. Digital transformation is changing the world, and Switzerland is a global leader in innovation. With the goal of remaining competitive in the digital age, Innosuisse promotes the transfer of knowledge and technology between companies and universities. It brings partners from these two areas together in applied research and development projects and provides assistance to startup companies during the development phase. Innosuisse has a budget of 200 million Swiss francs.

Innosuisse provides funding for:

- market-oriented R+D projects carried out jointly by companies and universities in the areas of industry and services,
- the establishment and development of science-based companies,
- transfer of knowledge and technology through platforms and networks.

R&D project grants are available in all disciplines involving scientific innovation. Project applications are submitted in accordance with the bottom-up principle. Grants are awarded on the basis of innovative content and market potential.

In its Venturelab program, Innosuisse helps promising entrepreneurs get started by guiding them through customized training modules. The modules give them the tools and methods they need to implement an exciting business idea and establish a new company. Young entrepreneurs can also apply for professional coaching. Support is provided to knowledge-intensive technology-based companies with great market potential.

Innosuisse promotes knowledge and technology transfer (KTT) between universities and industry, where this does not happen without support. CTI's KTT support strengthens knowledge and technology transfer between universities and industries in the same region. Professionally run national thematic networks (NTNs) provide on-site assistance to SMEs and universities in making contacts and developing projects.

Innovative Swiss companies and researchers are also offered development opportunities through access to international programs and networks such as IS, ESA, and EUREKA.

14.2.5 Technology Parks and Business Incubators

Facilities and support centers designed to encourage or facilitate entrepreneurial activity are now part of an economy's infrastructure. Switzerland has a large number of technology parks and business incubators or start-up centers. Most have joined together to form networks or associations. They differ in concept and specific focus; some have developed in close cooperation with universities while others stem from purely private initiatives. They offer premises (generally at preferential rates) for the start-up and development phase as well as shared infrastructure and professional support.

Participation by their umbrella organizations in international networks enables them to use technology park infrastructures throughout Europe. This enables companies to speed up the difficult start-up phase and save on start-up costs. A number of business incubation centers have also been formed in major cities. They too serve as short-term start-up locations for foreign companies establishing new operations in Switzerland by providing flexible and expandable premises, contacts, and business incubation support.

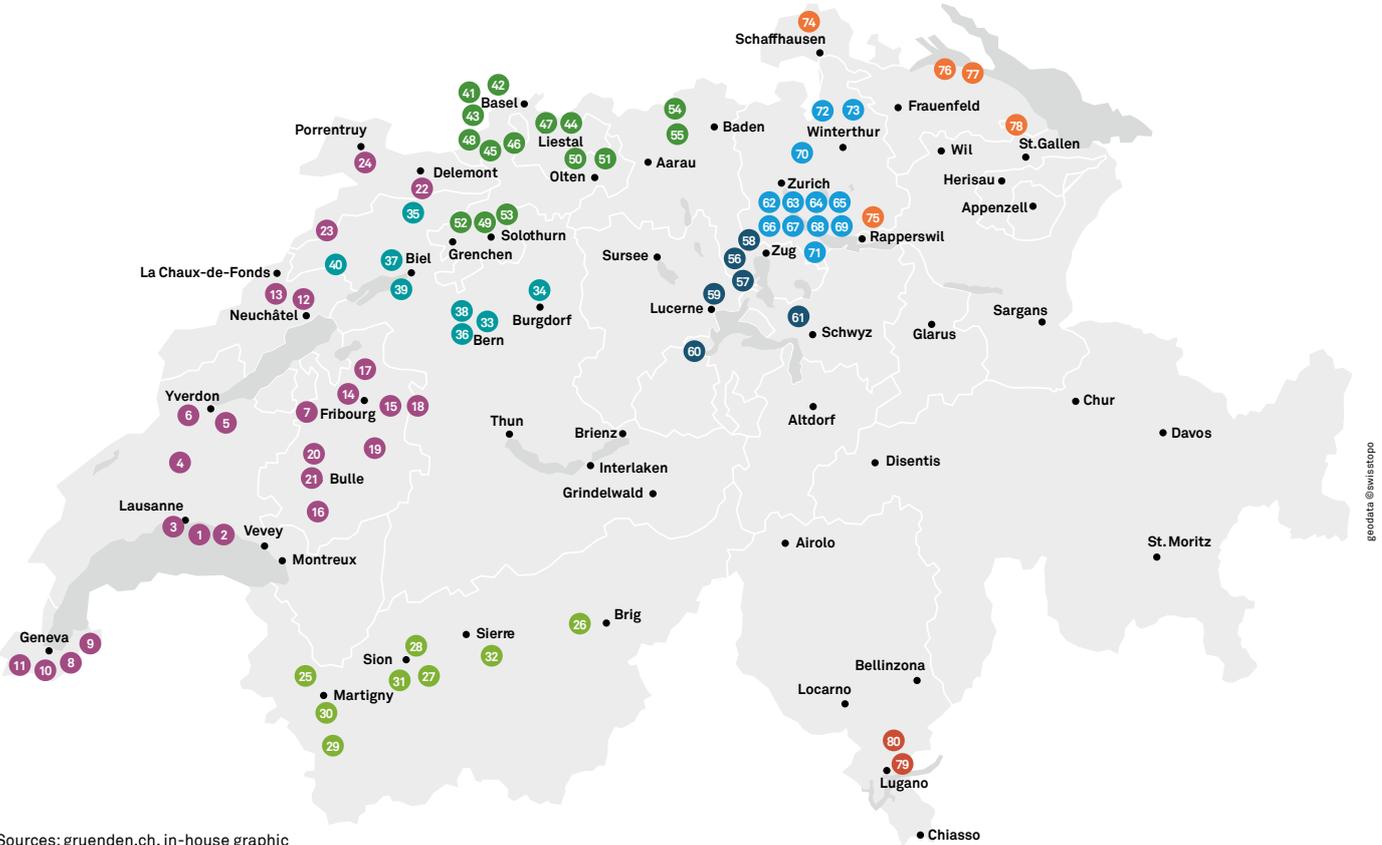

Technology parks and business incubators have the following advantages:

- They provide services such as consultation, coaching, telephone services, etc.
- They offer contacts to universities
- Companies are surrounded by like-minded entrepreneurs
- Infrastructure and flexible premises
- Networking
- Higher chance of success: the average survival rate is more than 90%
