

With us,
fruits and vegetables
stay fresher longer,
from grower to consumer,
and that's the way it looks.
Convincing real-life
cases enclosed.

Natural coating – Patent protected

Advantages of AgroSustain's natural coating

The following real-life cases illustrate the difference between **naturally coated** and uncoated fruits or vegetables.

Enjoy the difference!

Extension of crop's shelf-life – from 2 days to up to 1 month, facilitating inventory management

Effective – extends the shelf-life and decreases water loss up to 97 %

No effect on ripening – our coating can be applied before or after industrial ripening

One solution – is effective on over 20+ types of crops

Reduction of plastic – helps to reduce or replace plastic packaging

Cheaper transportation – replacing air with ocean freight

Cherry

Origin: Switzerland

Shelf-life increased by
7 days

Weight loss reduced by
54%

Wrinkled skin significantly reduced
