

CéMega Junior Solution

Supports healthy
brain development
and improves **vision**

CéMega

Junior Solution

What is CéMega Junior Solution Product?

It is a food supplement that contains omega-3 fish oil (EPA and DHA) with a mixture of vitamins and added honey. It supports overall health, especially neurological functions and brain development, cardiovascular health, and improves vision. It boosts the immune system and reduces hyperactivity disorder.

CéMega Junior is suitable for children, pregnant women and nursing mothers, and people with insufficient amounts of fish in their diet. Omega 3 unsaturated fatty acids must be obtained through diet as the body cannot produce them.

CéMega Junior contains no artificial colors, flavors, or aromas. It is made with honey and natural products.

Active Ingredients and Effects

- **Omega 3, Docosahexaenoic acid (DHA):** supports proper brain and heart function.
- **Omega 3, Eicosapentaenoic acid (EPA):** supports brain function and eye health and has an anti-inflammatory effect.
- **Honey:** contains minerals, vitamins, and antioxidants that provide children with a tasty product rich in nutritional benefits.
- **Vitamin C:** boosts immunity, builds stronger and denser bones and maintains the tooth enamel.
- **Vitamin E:** boosts immunity and improves vision.
- **Vitamin A:** promotes tissue and bone repair, supports healthy skin and eyes, and boosts immunity.
- **Vitamin D3:** aids in calcium absorption for the normal growth, and development of bones and teeth.
- **Vitamin B9 (Folic acid):** helps healthy red blood cells formation and contributes to proper DNA production.
- **Vitamin B12 (Cyanocobalamin):** enhances the formation of red blood cells, and promotes a healthy nervous system.
