# Myofol<sup>®</sup>

## What is Myofol<sup>®</sup> Product?

It is a food supplement that contains Myo-Inositol, White Kidney Bean extract, and Folate to enhance the fertility of women with PCOS by optimizing ovarian function and regulating menstrual cycles.

## Active Ingredients and Effects

- **Myo-inositol:** improves ovarian function by reducing the excess levels of circulating insulin in the blood relative to the level of glucose. This affects LH secretion, which reduces hyperandrogenism in women with oligomenorrhea and polycystic ovaries, consequently restoring the woman's fertility.
- **White Kidney Beans:** induce weight loss and reduce the postprandial spike in blood glucose levels.
- **Folate:** fortifies the formula and reduces the risk of birth defects, especially neural tube defects which include spina bifida and anencephaly when taken around the time of conception.

## Uses

- Alleviates PCOS (Polycystic Ovary Syndrome) symptoms
- Optimizes ovarian function to enhance fertility
- Regulates menstrual cycles

## Directions of Use

Empty the content of 1 sachet in a glass of water and drink it once daily, or as recommended by the healthcare provider.  
For adults only.

## Amounts of Active Ingredients

Per 1 Sachet: Myo-Inositol (2000 mg), White Kidney Beans d.e. (100 mg), Folate (200 mcg).

Enhances the **fertility of women** with PCOS
