(Oct 2022, Privacy Days, Luxembourg)

### Overview

**Vision:** As Business is becoming increasingly digital, where remote work is the new norm and where we are witnessing an explosion of cyber-attacks and economic espionage, Sharekey has the firm ambition to become the European reference for the exchange of confidential data and for the collaboration within and outside the enterprise (zero-knowledge, zero-trust).

**Mission:** Protect all confidential and sensitive data (privacy by default) and change the way we work, collaborate, and communicate in business.

**Promise:** With Sharekey, you own and control your data from anywhere, from any device.

### Problem > Secure Business Privacy

How to bring business parties to interact seamlessly on a common workspace they don't need to trust and through which they can communicate, collaborate and exchange sensitive data privately?

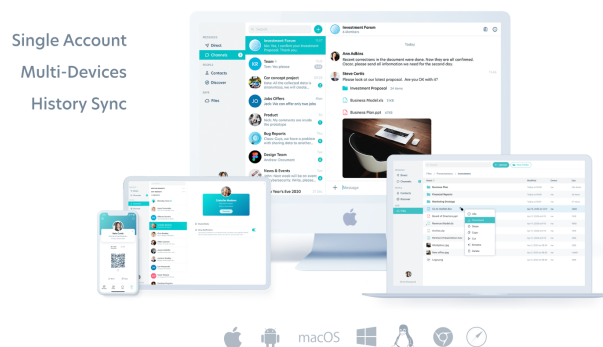

### Solution > Swiss Collaboration App

**All-In-One:** Messages, Voice & Video, Storage, Calendar, Notes, Crypto Wallet,...

**Easy to Use:** Simplicity and easy sharing, as user-friendly as consumer apps.

**App-to-App Encrypted:** 256 bit crypto engine, no backdoor, no metadata.

**Swiss Privacy Laws:** Under Swiss Data Privacy Act (DPA), no CLOUD Act.

### Why Sharekey is unique?

Swiss & Private (you have the key), no metadata.

On Invitation Only (invite/revoke contacts).

All-in-One multi device, one single app for all your business collaboration.

Designed Enterprise-grade (CIO Friendly, low touch on IT).

Drastically reduces carbon footprint.

### Disruptive Technology focusing on Privacy & Sustainability

Voice communications & Video conferencing, all app-to-app encrypted.

Electronic signatures & immutable transactions (timestamp via "Pin to Blockchain").

Crypto wallet and enabler to the Web 3.0.

Low carbon impact by default (share the key instead of large volume of data).

### Commercial offer

SaaS with a Freemium subscription:

<b>Member</b>	up to 100MB	Free
<b>Pro</b>	up to 1GB	Subscription per Member, per month
<b>Business</b>	up to 1TB	Subscription per Member, per month
<b>Enterprise</b>		Tailored
