

Telecom26 Overview

INSTANT GLOBAL COVERAGE FOR
YOUR CONNECTED DEVICES

Telecom26

WHO WE ARE

Founded in Switzerland in 2012, Telecom26 is a global mobile service provider, with an advanced core network and offering a wide range of flexible connectivity solutions. Our HQ is in Switzerland, backed by a network of 6 regional offices.

A full service portfolio

We've created a full-service portfolio to enable cross-border solutions for IoT, voice, data and messaging services, spanning land, sea and air. This enables us to offer reliable and secure coverage on any network. With 5G, our solutions enable new connectivity options for public and private infrastructure.

Global network footprint

We built our infrastructure and network from the ground up, creating a global footprint, with a virtualised, distributed core. This delivers exceptional resilience and redundancy, with industry-leading uptime and performance.

Operator
Member

Industry collaboration and participation

Telecom26 is a full operator member of the GSMA and the ITU.

Business critical coverage. Wherever you need it.

Fully standards-based, our flexible architecture delivers Tier-1 performance for critical applications and services.

We cover 2G, 3G, 4G and other wireless technologies, with eSIM / eUICC, providing convenience and reliable coverage with managed solution options.

Our coverage is secure, resilient and can be tailored to meet specific and evolving needs, backed by a globally distributed core network, optimised for mission-critical services.

We help our customers obtain coverage, wherever they need it.

- 2G, 3G and 4G
- All SIM form factors
- 1100+ network agreements
- Coverage in over 210 territories
- Multiple operators in-country

Our leadership team

A TRACK RECORD OF INNOVATION AND SUCCESS

Telecom26 is led by a team of seasoned industry executives, each with more than 25 years' experience in the mobile communications industry.

We have led operators, MVNOs and vendors and have a track record of consistent innovation and successful service delivery.

We are proud of our outstanding performance and advanced network architecture, which provide the resilience and quality our customers need.

Our innovation and flexibility allow us to tailor solutions to specific circumstances, as well as to offer a range of turnkey solutions.

We have more than 50 employees in 6 countries.

Telecom26

END-TO-END SECURITY BY DESIGN

Telecom26 enables end-to-end security based on collaborative ecosystems of device manufacturers, mobile operators and application developers.

We ensure subscriber confidentiality and data integrity.

From identity lifecycle management on the SIM, private APNs, bespoke firewalling and vulnerability/threat detection we deliver the highest levels of security.

Our network is secure by design.

Advanced network architecture

UNIVERSAL NETWORK ACCESS AND COMPREHENSIVE SOLUTIONS FOR IOT CONNECTIVITY.

We're an independent, global mobile operator, with our own network core and operational assets.

As a fully accredited mobile operator and a proud full member of the GSMA, we help our customers to obtain secure IoT network coverage, wherever they need it.

Secure, optimised for enterprise

We provide secure, optimised global connectivity for enterprises, OEMs and NGOs, who need cross-border solutions and a single delivery partner. Our IoT network coverage is secure, resilient and can be tailored to meet specific and evolving needs.

We offer a truly global IoT connectivity solution which matches your ambitions and requirements, backed by a unique mix of network assets.

Our expertise, knowledge and flexibility enable us to tailor solutions to specific markets and locations.

Telecom26 - The network that's optimised for IoT connectivity.
