

# INNOVATION BORN OF TRADITION

60 YEARS OF EXCELLENCE IN MEDICAL TECHNOLOGY

# MILESTONES IN THE COMPANY'S HISTORY

Choose  
Hermann  
Medizintechnik  
for innovation,  
tradition, high  
quality and the  
motivation for  
always providing  
an outstanding  
service to meet  
the individual  
needs and de-  
mands of our  
customers”

**1961** Foundation of the company by Hans Hermann in Fridingen an der Donau. He was a master in surgical instrument mechanics. His corporate philosophy, characterized by the highest quality standards and an unconditional desire for innovation, leads to rapid growth and continued success to this day.

In **1969**, Hans Hermann started to manufacture tungsten carbide scissors as a pioneer throughout Europe, and those remain a key component of our success.

At the end of the **1980s**, we started developing and manufacturing instruments for minimally invasive surgery.

In **1995**, we added innovative titanium implant systems to our program.

We have been one of the first companies in the entire Tuttlingen area that has implemented a quality management system and receive ISO 9001/EN 46001 certification.

In **2000** and **2007** we increased our capacity by building additional production premises at our site in Fridingen.

In **2006** a new subsidiary of Hermann Medizintechnik was established in Neuhausen am Rheinfall – Switzerland.

**Today**, Hermann Medizintechnik is a mid-size family owned company in the third generation with 70 employees. With international customers from over 60 countries on six continents, we continue to expand and remain as innovative and dynamic in the future as we have been for six decades.

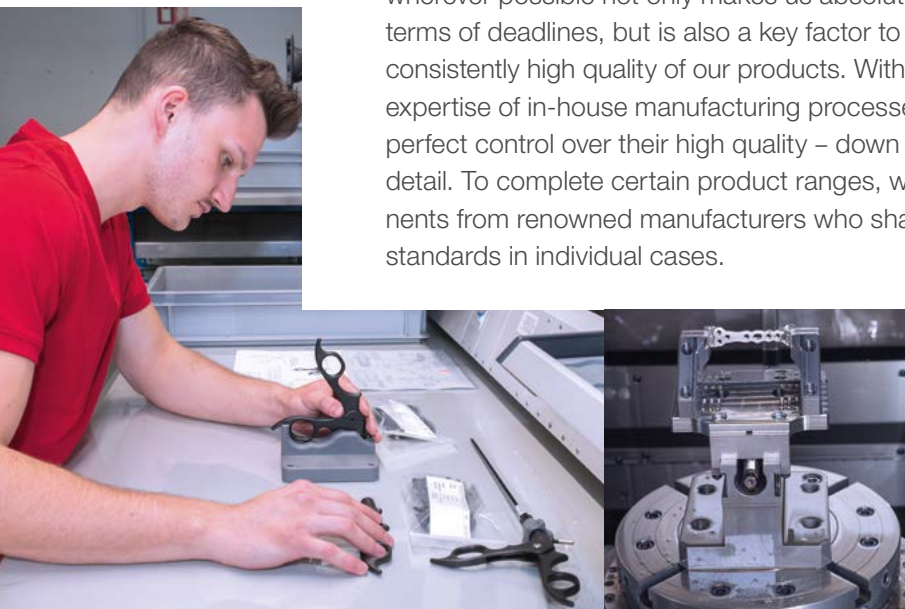

# HIGH-TECH AND KNOW-HOW FOR YOUR SUCCESS

## SUSTAINABLE QUALITY THROUGH BROAD EXPERTISE OF IN-HOUSE MANUFACTURING PROCESSES

The fact that we avoid external processes and services wherever possible not only makes us absolutely reliable in terms of deadlines, but is also a key factor to guarantee the consistently high quality of our products. With a consistently expertise of in-house manufacturing processes, we have perfect control over their high quality – down to every small detail. To complete certain product ranges, we use components from renowned manufacturers who share our quality standards in individual cases.

## CONTRACT MANUFACTURING AT THE HIGHEST LEVEL

Use our know-how and our state-of-the-art machinery for your production. We have outstanding expertise and powerful equipment in the following services:

- Hardening and brazing of carbide inserts using the vacuum hardening process
- Laser welding
- Laser marking
- Passivation and final cleaning with packaging
- Assembly of subassemblies
- Surface treatment such as:
  - Sandblasting
  - Electropolishing
  - Gold plating
  - Anodizing of complex titanium parts
- CNC turning
- CNC milling with up to 7-axis machining

We have many years of experience in the manufacturing process of various materials such as plastics, CoCr steel, stainless steels, titanium and titanium alloys or aluminum. Of course all offered processes are validated by our experts.

## WIR STEHEN FÜR INNOVATION UND KOMPETENZ

- Elektrotechnische Anlagen und Installationen
- Mittelspannungsanlagen
- Niederspannungsverteilersysteme
- Datennetze
- Automatisierungstechnik
- EIB Infrastruktursysteme
- Einbruchmeldeanlagen
- Brandmeldeanlagen

ELEKTROTECHNIK

## R&D AND QUALITY MANAGEMENT

In addition to these technical processes, we are also happy to assist you in the earliest beginnings. In the early development and drawing creation we're using state-of-the-art CAD/CAM programs with the option of 3D rapid prototyping. We are also happy to perform any measurements for you with various highly accurate measuring tools.

In order to ensure the consistently high quality of our products and services from development through manufacturing to distribution, we are certified according to DIN EN ISO 13485:2016 and MDSAP. Our quality management system fulfills the requirements of Medical Device Directive 93/42/EEC and also meets the regulatory requirements of various countries worldwide.

## OEM MANUFACTURING

An important focus of our spectrum is the production of OEM components and products for internationally renowned companies and market leaders in the medical sector. With our many years of experience in the fields of orthopedics, minimally invasive surgery, neurosurgery as well as titanium implant manufacturing, we are the ideal partner for you. You can rely on experience, our highly qualified specialists and with certainty we will meet all specifications at highest quality and precision.

# PIONEERS IN MEDICAL TECHNOLOGY

## STEADY DEVELOPMENT AS A FIXED CONSTANT

Ever since Hans Hermann, the founder of Hermann Medizintechnik GmbH, manufactured the first products in 1961, innovative strength and the will for continuous improvement have been essential elements of the company culture. As early as 1969, we've been the second company in the world and the first in Europe to start manufacturing surgical tungsten carbide scissors. This pioneering spirit still characterizes our company today. To initiate groundbreaking developments by ourselves or to make them quickly usable is a quality for which our worldwide customers appreciate us. Our production is equipped with state-of-the-art technology and allows us to manufacture the latest medical technology products and devices with highest precision.

## HIGHEST QUALITY IN EVERY DETAIL

We offer a wide product range which includes surgical and endoscopic instruments, implants made of pure titanium and titanium alloys as well as customized special instruments for a wide variety of surgical procedures. The first class quality is common to our products and services. In order to ensure this continuously, we're not only constantly investing in qualification and training of our employees but also in equipment that is always at the cutting edge.

**Für jahrelanges Vertrauen braucht man jahrelange Erfahrung.**

**Morgen kann kommen.**

Wir machen den Weg frei.
