

## SAFE-PROOF YOUR PRODUCTION

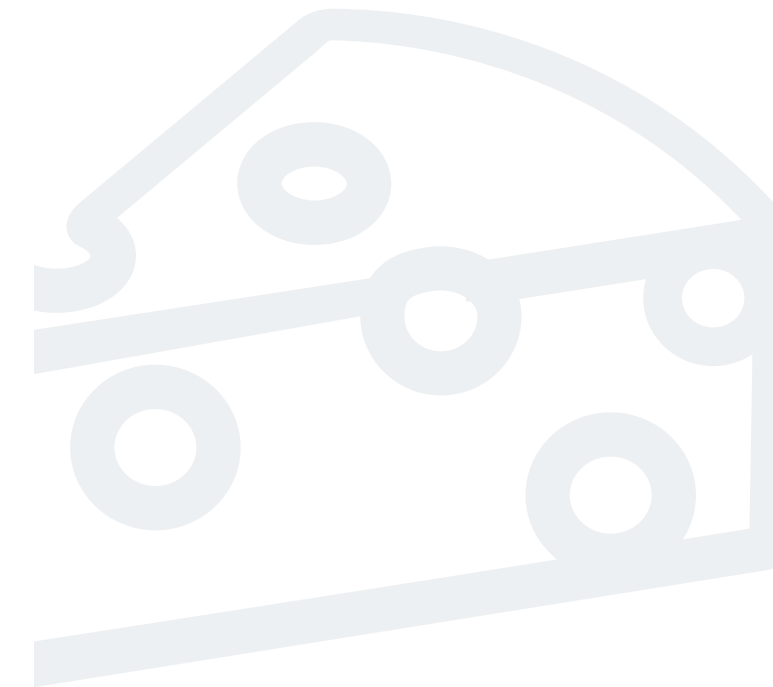

Automating your line has never been easier with the scalable solutions from Sapal. By using modular units they can be easily adapted to meet future needs, including greater production volumes and higher speeds. Combined with an extensive range of after sales services, we are there to support you today and tomorrow.

Our comprehensive portfolio of services tailored to your specific needs includes Modernization, Spare Parts, Field Service, Technical Audit and Training for your employees. Everything has been designed for a single purpose: to assist you in achieving maximum output and minimum downtime for your Sapal and former Kustner packaging machines. Additionally, we can provide a refurbishment service for your used machines. This means we can purchase, refurbish and sell your machines, providing an economic alternative for your investment.

## PACKAGING SOLUTIONS PROCESSED CHEESE

Choose a reliable partner that shaped the market for more than 115 years.

SAPAL SA

Av. du Tir-Fédéral 44 - 1024 Ecublens - SWITZERLAND - Phone +41 (0)21 633 53 00 - Fax +41 (0)21 633 52 11 - info@sapal.ch - www.sapal.ch

## CHOOSE THE RIGHT PARTNER

Focus on long-term partnership that delivers results today and tomorrow.

Keeping in mind how challenging it is to differentiate your product on supermarket shelves, we create unique solutions that help you stand out at point of sale. Offering a wide range of pack styles, we can recommend a solution that will both appeal to your customers and help you maintain effective production.

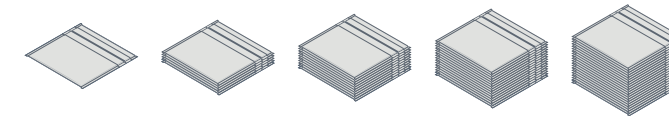

### BENEFITS

- Brand differentiation with a premium pack style
- Short delivery time of spare parts
- Worldwide sales network and extensive after-sales support
- Whole range of high-speed machines with long lifecycle
- Optimized changeover time
- Fast return on investment

# SELECT YOUR PERFECT SOLUTION

## THE DCS LINE

Processed Cheese Slices / Wrapping Machine

Based on the Kustner technology, Sapal can offer you a complete line of IWS wrapping machines, from 500 to 2000 slices per minute.

Allowing all types of recipes, easy to operate and to maintain, with a very good accessibility and visibility thanks to a practical and functional layout, the DCS 0500, the DCS 1000-2 and the DCS 2000 can totally be adapted to your needs.

Offering a mirror version - with front or back exit - back transparent doors and a brand-new sliding stacker, these 3 machines are the solution to reduce your maintenance costs and improve your efficiency.

### DCS 0500

The new DCS 0500 is an ergonomically designed entry-level packaging line for the production of individually wrapped cheese slices (IWS) for an extended shelf life.

Conceived for a 500ppm production, the output of the DCS 0500 can be increased to reach up to 1000 processed cheese slices per minute, through a quick and easy upgrade and without worrying about footprint in your plant or manpower costs.

### DCS 1000-2

The brand new DCS 1000-2 - the high-speed version based on the DCS 0500 - gives you the possibility to run with a single lane up to 1000 slices / minutes.

### DCS 2000

Enjoy very high-speed production up to 2000 slices per minute and the precise filling of processed cheese slices. The DCS 2000 allows you to produce two time faster than the DCS 1000-2 with two lanes on one drum, which reduces the footprint of your machine.

### KEY-FEATURES OF THE LINE

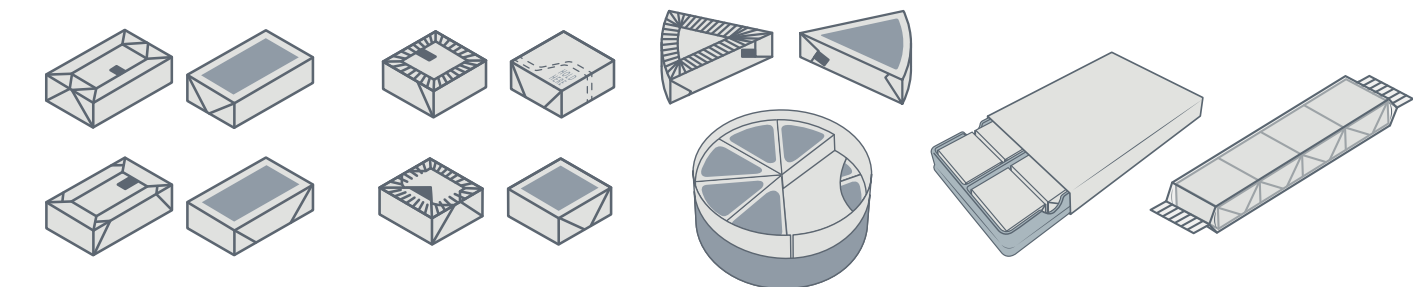

- Optimized and customized layout
- Film Centering
- Back transparent doors
  - Better visibility and accessibility
- Sliding Stacker
- Drying Unit
- Smaller Cooling Tank

### BENEFITS OF THE LINE

- Perfect packaging
  - Strong sealing to avoid leakage
- Highly reliable
  - Built on the **KUSTNER** technology
- High efficiency and availability of the machine
- High quality product
- Suitable for a large range of recipes, flavors or ingredients
- Very good dosing accuracy and homogenous shape
- Motorized horizontal stacking devices

## THE DCP LINE

Processed Cheese Portions / Conditioning Machine

### DCP 0300

DCP 0300, the new-generation packaging line for processed cheese, integrates the latest technology to help you produce more, with a better quality and higher efficiency.

This Mecatronic machine offers you a flexible solution for a fast and easy change over in sizes (weight) and portion shapes such as triangle, rectangle or square and has a maximum output up to 300 wraps/minute.

### BENEFITS

- Multi-flavor production
- High efficiency
- High dosing accuracy
- Flexibility
- Practical and functional layout
- Full integrated boxing unit
- High quality product

### DCP 0600

The DCP 0600 exists in three different versions offering a robust solution to process simultaneously on 4 tracks triangular, square or rectangular cheese portions, up to 540 wraps/minute.

For the triangular portions, the DCP 0600 can also offer a secondary packaging unit enabling single to multi-layer round boxing. For square or triangular portions, we can offer you a turnkey solution for the secondary packaging too.

### BENEFITS

- Reliability (Proven technology)
- Inline design
- High availability & efficiency rate
- Filling accuracy & automatic weight adjustment
- Multi-flavour production
- High quality product
